PART I
GENERAL CONSIDERATIONS

**1974 FISCAL YEAR CAPITAL BUDGET INCLUDING
DEPARTMENTAL PROJECTIONS OF CAPITAL
NEEDS FOR FIVE-YEAR PERIOD 1974-1978
AND RELATED STATE OF MARYLAND BONDED INDEBTEDNESS**

General Considerations and Fiscal Summary

The Department of State Planning, under its basic legislative authority, serves as one of the Governor's principal staff agencies, and is assigned, primarily, two major capital improvements budget responsibilities. They are: (1) Preparation of the Governor's annual capital budget, and (2) compilation of a proposed five-year capital improvements program for the State.

The Capital Improvements Division of the Department of State Planning is thus required to analyze, evaluate, recommend and schedule those projects of greatest urgency and importance operationally, from hundreds submitted, to ensure that the State's physical plant facilities keep pace with program needs and the demands of an ever increasing population. Such projects are carefully related to an integrated five-year development program. The program classifies projects in accordance with needs and recommends a time sequence for their construction. Also contained therein is the estimated cost of each project and an indication as to the potential impact on operating and maintenance costs. In preparing the program, the Department of State Planning has the collaboration of the Department of General Services and the Department of Budget and Fiscal Planning.

To aid in the accomplishment of this task, the capital improvement programming procedure has been thoroughly formalized and is continually monitored to implement new innovations. It includes the preparation and distribution of detailed instructions and project submittal forms, application of space criteria, departmental hearings, and maintenance of close liaison with all State Agencies and institutions to thoroughly understand and evaluate programs and facility needs. To facilitate close coordination with the Legislature, members of the Capital Budget Committee of the Legislative Council participate in the on-site inspection trips and the annual departmental hearings.

Capital outlays in Maryland, excepting transportation facilities which are supported by the Consolidated Transportation Bond Program and some other projects supported by revenue bonds, are financed primarily through issuance of general obligation bonds which pledge the full faith and credit of the State. These general obligation bonds, by constitutional provision must be amortized within a fifteen-year period and they are fully secured by the State property tax. It should be noted in this regard that a constitutional amendment Chapter 372, Laws of Maryland 1972, passed by the General Assembly and ratified in the General Election on November 7, 1972 augmented the State property tax provision. The amendment does not change the conditions but adds that the annual tax shall not be collected if sufficient funds to pay the principal and interest of the debt are appropriated for this purpose in the annual State budget.

Although essential capital needs must be provided; however, it is of utmost importance that such outlays, whether through bond funds or provided for in the annual State budget, be held within safe limits so as to maintain the State's long-

standing triple "A" credit rating. In past years when fiscally permissible, certain categories of projects have usually been funded from general fund revenues; e.g., all capital projects costing \$100,000 or less, all equipment items and planning funds. However, because of the general economic situation during fiscal 1972, the financial demands of fiscal 1973, the yet undetermined effects of Federal Revenue Sharing and its impact upon the State, general funds for these purposes were not available and are unlikely to be available for the fiscal year 1974.

Legal Requirements and Directives

Development of the annual capital budget and the State's capital program is subject to control in the form of legal requirements and other directives. Among the key legislative requirements concerning capital projects and procedures are:

1. State secretariats, departments and agencies shall transmit to the Secretary of State Planning a statement of all capital projects proposed to be undertaken for study, advice and recommendation by the Department of State Planning for consideration as an inclusion in the capital program of the State. Such secretariat, department or agency shall also, upon request, submit such information to the Department of State Planning and the Department of Budget and Fiscal Planning as these agencies may require in the preparation of the program. The Department of State Planning shall receive the assistance of the Department of Budget and Fiscal Planning in connection with the preparation of the annual capital budget. (Art. 88C, Sec. 6, Annotated Code of Maryland)
2. A project to be classified as a capital improvement shall have a useful life expectancy at least equal to the life of the bonds by which it is financed. (Art. 78A, Sec. 2, Annotated Code)
3. Monies derived from the sale of State construction bonds shall be used only for capital improvements and for no other purpose. (Art. 78A, Sec. 2, Annotated Code)
4. If a project has not been contracted for within two (2) years from the effective date of the General Construction Loan Act, then such project shall be deemed to have been abandoned. (Chapter 229, Laws of Maryland 1972, carries provisions of Sec. 10 of Chapter 435 of the Acts of 1968, as amended by Chapter 512 of the Acts of 1970 relating to certain construction projects contained in the General Construction Loan of 1968)
5. No work shall be started on any project without satisfactory assurances to the Board of Public Works that the project can be completed within the funds authorized. (A provision included in each General Construction Loan Act)
6. Unexpended funds remaining after a project is completed and accepted shall be applied to the reduction of the outstanding indebtedness of the State within one year after the date of final acceptance of the project by the State. (Art. 78A, Sec. 3, Annotated Code)

7. Each construction appropriation request submitted to the General Assembly for a permanent or long-time construction project must be accompanied with preliminary plans and specifications. (Art. 15A, Sec. 10, Annotated Code)
8. All requests by State agencies for capital projects shall be submitted to the Department of State Planning before July 1 of the fiscal year prior to the fiscal year in which they are to be commenced unless the requesting Department declares the project to be an emergency. (Art. 88C, Sec. 10, Annotated Code of Maryland)
9. No appropriations shall be authorized for preliminary planning funds unless the agency in question has submitted to the Department of State Planning a program describing in detail the purpose of the project for which funds are being requested. (Art. 88C, Sec. 10, Annotated Code of Maryland)
10. No changes shall be permitted in any project for which funds are requested after the preliminary plan has been completed and approved except upon the approval of the Secretary of the Department of State Planning and the Secretary of General Services. (Art. 88C, Sec. 10, Annotated Code of Maryland)
11. No land shall be acquired for any State park which is in excess of the number of acres approved by the General Assembly for this park. The approval of the General Assembly shall be required for any revisions to the Maryland Outdoor Recreation and Open Space Plan prior to the initiation of any action to obtain additional land for any State park. (Art. 66C, Sec. 344B, Annotated Code of Maryland)
12. Payment of State Debt. To provide that the annual tax required to be levied to pay the principal and interest on State debt authorized by the General Assembly is not levied if sufficient funds for the debt are appropriated in the annual State budget. (Amendment to Sec. 34, Art. III, Constitution of Maryland, ratified by the voters, November 7, 1972)

In addition to the foregoing specific legislative requirements, other directives have been issued which bear directly upon procedures and policies concerning budgeting and programming. They include:

1. A directive of the Governor specifies that members of the Secretariat and other heads of all State departments and agencies shall submit their capital budget requests to the Department of State Planning on or before July 1 of the new fiscal year. Each State department and agency shall reduce their supplemental requests to those projects deemed to be an emergency at the time of submission or which adversely affect the health and welfare of the citizenry of the State of Maryland, and which, by their very nature, could not be included by the aforementioned deadline. These specific requests must be submitted to the Governor through the State Department of Planning, for their detailed evaluation prior to his approval. All departments shall continue to submit their proposed capital improvements projects constituting their five year program.

2. Toward the objective of strengthening long-range programming, the Governor also directed that the operating departments give renewed impetus to:
(1) periodic review of their long range (10-year) capital improvements programs, and (2) specifically assign responsibility for such long-range programming within their agency.
3. Declaration of legislative intent, as follows:
 - (a) Items which properly belong in the operating budget of the State shall not be included in the annual capital budget, especially those as relate to repair and maintenance work, and minor equipment items. (See classification and Code of Objects of Expenditures, Budget Bureau, Department of Budget and Fiscal Planning)
 - (b) When an appropriation has been made for the preparation of preliminary plans and specifications for a capital project, such plans shall be in the hands of the Department of State Planning for at least six months before that agency is authorized to recommend inclusion of construction funds for the project in a construction loan.
 - (c) Disapproval is expressed by the Finance Committees of the General Assembly of action by members of the Secretariat and other heads seeking to bypass the authority of the Department of State Planning by bringing rejected, deferred or unreviewed projects directly to the Finance Committees in a belated effort to have them included in the capital budget under consideration.
 - (d) Bring into perspective the near term and future goals and supportive objectives through increased emphasis to long range planning through submittal of an updated 10-year development plan.

To assist the State departments and institutions in the development of their annual capital budget, projections of capital needs for the five-year period and a long range development program, the Department of State Planning has issued and distributed to all departments a revised series of Planning Instructions, issued July, 1971, which spell out procedure and include sample forms for the preparation and submission of capital project requests including a Long Range Development Program.

Capital Budget and Program Development

During the preparation of the 1974 Fiscal Year Capital Budget, the Department of State Planning reviewed more than 325 individual projects submitted by some 52 major State agencies and institutions including those within the eleven established secretariats. The estimated cost of these proposed projects approximates \$157,629,300. Individual project requests range from \$2,400 to \$17,841,400.

All projects requested for the fiscal 1974 Fiscal Year Capital Budget were designated by the departments as urgently needed and assigned priority ratings to serve as helpful guides in the screening process. Those projects which relate to health, safety and welfare of the people are given high priority. Preparation of a capital

budget that will fulfill department needs without undue sacrifice or impairment of functions is a difficult task. Also, an additional consideration is the responsibility of holding new debt formation within sound fiscal parameters.

This report includes a tabulation of all capital improvement projects, other than highways, mass transit, port and airport facilities funded through the Consolidated Transportation Trust Fund of the Maryland Department of Transportation. In addition, are the non-State-owned assets as well as other projects separately funded from the annual General Construction Loan, which various State agencies and institutions propose be undertaken during the five-year period, 1974-1978. This compilation of capital projects, presented in Part IV of this report, provides a longer range perspective as to future capital needs and the estimated costs of financing required.

Magnitude of Past and Projected Capital Needs and Basic Fiscal Data

During the 12-year period, 1961-1972, the General Assembly has authorized capital outlays aggregating \$1,636,199,658 exclusive of those projects, e.g., highway construction, certain mass transit, port and aviation facilities funded through the Maryland Department of Transportation's Transportation Trust Fund. Of the aforementioned sum, \$692,733,658 was authorized for various State-owned capital assets—Higher and Special Education, \$324,616,635; General Control (including the Annapolis and Baltimore complexes), \$107,220,500; Health, Hospitals, Mental Retardation and Juvenile Services, \$85,061,573; Transportation (prior to the Transportation Trust Fund), \$68,421,200; Natural Resources and Recreation, \$62,628,900; Public Safety and Correctional Services, \$39,810,250; and Economic and Community Development, \$4,974,600. The remaining \$943,466,000 was authorized as direct grants for non-State-owned assets, largely to match local and federal funds in such areas as higher and special education, public education, recreation, sanitation, water quality, nursing homes, hospitals, jail improvements, airport development, mass transit, and economic and community development. The amortization cost (interest and repayment of principal) of these loans is borne by the State.

During the 1972 legislative session, funds authorized for State-owned capital assets increased by \$103,410,500, whereas authorized appropriations for non-State-owned capital assets increased \$371,175,000. Included in the latter figure is \$300,000,000 attributable to the State Public School Construction and Capital Improvement Loan of 1972. This represents a \$150,000,000 increase over the prior year appropriation associated with the State takeover of the Public School Construction program. The State subdivisions' proposed six-year (fiscal 1973-1978 inclusive) public school construction program is expected to approximate 1.1 billion dollars. Funding of the Public School Construction program and other non-State-owned projects are generally separate from the regular capital budget of the State agencies and institutions, the latter which are financed through the General Construction Loan and General funds the funding of which depends upon their availability. The remaining balance of \$71,175,000 is primarily attributed to the Friendship International Airport (purchase) Loan of 1972 totalling \$36,000,000 and the Public Junior or Community Colleges, Home Finance Loan, Solid Waste Reclamation Loan, etc.

The following tabulation summarizes for the past five years the projected five-year capital programs submitted by the various State agencies and institutions as well as the annual capital budget requests and the annual capital appropriation authorized by the General Assembly:

Fiscal Year	Five Year Capital Program Submitted By Departments	Projects Requested for Annual Capital Budget	Annual Capital Budget Appropriations Authorized by the General Assembly		
			Bond Funds	General Funds	Total
1973	\$583,347,900	\$181,621,600	\$ 95,430,500	\$ 95,430,500
1972	453,516,000	150,825,500	104,703,200	104,703,200
1971	387,000,000	121,697,600	58,963,800	\$ 9,799,000	68,762,800
1970	301,700,000	108,000,000	73,493,200	73,493,200
1969	259,898,800	90,000,000	57,453,600	57,453,600

State agencies and institutions initially submitted requests as urgently needed for fiscal 1974 totaling \$173,500,800. Subsequent discussions reduced the total requests to \$157,629,300. The recommended fiscal year 1974 Capital Budget totals \$95,703,700. Excluded from the above figures are the proposed projects associated with the Public School Construction program for fiscal 1974 which are to be financed through a separate bond bill, sewerage loans and grants and other bonding requests not yet submitted.

Initially, the Five-Year Capital Program, 1974-1978, requests aggregated \$595,383,200. Subsequent deferral of projects with their revised costs, from fiscal 1974 to succeeding years and the inclusion of estimated costs associated with the Annapolis and Baltimore complexes' five-year development plan revised this figure upward to \$626,393,600.

The estimated five-year capital program total of \$626,393,600 indicates an average annual rate of capital outlay of \$125,278,700. Five years ago, the average annual proposed capital expenditures approximated \$51,979,700. Last year, this rate approached \$116,669,500. Increasing enrollments of higher education; the concept of community oriented facilities, both in the areas of health, hospitals, juvenile services, and correction; the response to governmental needs as evidenced by the Annapolis and Baltimore complexes and the impact of inflationary factors portray important elements in the increase during the current year. Apropos of this, it should be noted that during the five years, 1967-1972, Maryland's population increased approximately 10.1%.

Along with the increasing demand for State facilities, there exists renewed impetus to provide new and expanded programs and services outside the State's capital budget. This involves the issuance of State bonds to provide direct grants in some cases and in others the use of the State's credit to finance non-State-owned facilities. The State's takeover of public school construction, implementation of the new District Court system, Community Colleges support, Home Loan financing, Maryland Regional Cancer Center Loan are cited as examples. Consideration is being given to expanded utilization of special revenue sources to provide for some capital facilities rather than increased State property tax assessment, e.g., District Court construction amortized by court fees. In the three-year period 1972-1970, State bonds in the amount of \$617,105,000 were authorized by the General Assembly for

the construction of non-State-owned facilities. Of this amount, \$511,500,000 represents use of the State's credit and is repayable. The remaining \$105,605,000 represents direct grants. To effectively monitor all these bond authorizations and maintain a complementary perspective on the State's General Construction Loan, an ongoing review for their respective evaluations has been initiated. This procedure is fully supported by the Office of the Governor, the Joint Budget and Audit Committee of the Legislative Council, the Comptroller's Office, the Department of Budget and Fiscal Planning, the Department of General Services, and the Department of State Planning. All proposals of bond bills involving the authorization of State general obligation bonds, their review, evaluation, and recommendation are forwarded to the Governor and the pertinent committee of the General Assembly.

Basic Fiscal Data

The data presented in this section are useful in evaluating the State's fiscal position. It should be remembered that in referring herein to the State debt, the figures are exclusive of highway obligations which are serviced entirely by the dedicated highway use taxes and toll revenues. Also, certain capital expenditures attributed to mass transit, port and airport facilities funded through the Maryland Department of Transportation Consolidated Transportation Trust Fund have been similarly excluded.

As previously pointed out, capital projects of the various State agencies and institutions are financed by State general obligation bonds which are supported by the State property tax levy. Constitutional provision fixes the term of these bonds at 15 years. However, as previously noted, during the 1972 Legislative Session, a constitutional amendment, Chapter 372, Laws of Maryland, was passed by the General Assembly and ratified by the voters in the General Election held on November 7, 1972. Basically, it augments the State property tax provision by providing that the annual (property) tax shall not be collected if sufficient funds to pay the principal and interest of the debt are appropriated for this purpose in the annual State budget. Precisely what this means in terms of property tax revision, at this time, is not fully determined but is currently under study. To the degree that such provisions are exercised, it cannot but bolster the significant fact that for many years the State of Maryland has continuously maintained a triple "A" rating on its general obligation bonds.

As of June 30, 1972, State bonds outstanding aggregated \$876,176,000. As of the same date, bonds "authorized but unissued" totalled \$995,251,072. Thus, at the close of the 1972 fiscal year, the total State debt authorized amounted to \$1,871,427,072. It should be carefully noted that the State debt continues to be authorized at a much faster pace than is being issued, retired, or cancelled.

Included in the "authorized but unissued" figures are sizable loans for State Public School Construction and Capital Improvements, Maryland Port Administration, Outdoor Recreation Land Loans, State Roads Administration, Sanitary Facilities, Water Quality, Dredging Spoil, Area Vocational School Construction, and Maryland Housing Loans.

The Maryland Industrial Land Loan of 1972 for \$6,000,000; the General Public Junior or Community College Construction Loan of 1972 for \$10,000,000; the Home Financing Loan of 1972 for \$10,000,000, and the Anne Arundel County Water Loan of 1972 for \$3,000,000 were effective July 1, 1972 and are not included below. The aggregate of these is \$29,000,000.

The total "authorized but unissued bonds," as of June 30, 1972 increased by 33% as compared to the amount last year and are as follows:

Loan	Date	Amount
General Construction Loan	1964	\$ 760,900.09
General Public Junior or Community College Construction Loan	1964	4,802.01
General Construction Loan	1965	594,379.07
Sanitary Facilities Sewerage Loan	1965	1,863,780.00
General Public Regional Community College Construction Loan	1965	650,000.00
General Construction Loan	1966	428,911.07
Sanitary Facilities Sewerage Loan	1966	1,235,961.00
Area Vocational School Construction Loan	1967	152,588.70
General Public School Construction Loan	1967	1,075,000.00†
General Public Junior or Community College Construction Loan	1967	2,515.11
Sanitary Facilities Sewerage Loan	1967	7,491,516.00
Maryland Port Authority Loan	1967	16,000,000.00*
General Construction Loan	1967	13,049,124.79
Nursing Home Loan	1968	491,331.90
General Construction Loan	1968	24,370,090.18
Friendship International Airport Loan	1968	20,000,000.00
State Roads Commission Future Right-of- Way Revolving Fund	1968	15,000,000.00*
General Public Junior or Community College Construction Loan	1968	867,000.00
Water Quality Loan	1968	89,413,448.18
General Construction Loan	1969	41,364,945.03

nents and Mental Retardation Facilities		
Loan	1972	1,000,000.00
Total—Authorized but Unissued Bonds		
as of June 30, 1972		\$995,251,071.95

* These loans are not supported by the State's property tax.

† These loans are not supported by the State's property tax. Payment of principal and interest on bonds issued by the State prior to January 1, 1958 is made by the Counties and Baltimore City to the State from local taxes levied. Payment of principal and interest on bonds issued by the State on or after January 1, 1958 is made through deductions by the Comptroller of the Treasury from funds due said Counties and Baltimore City under the applicable provisions of State Law relating to the Income Tax, the Tax on Racing, the Recordation Tax, the Tax on Amusements, the License Tax and the School Building Construction Aid Program. These payments are to be made within fourteen years from the date of the issuance of the Bond Certificates. Effective June 1, 1971, legislation was passed by the General Assembly whereby the State assumed the costs of all future public school construction; and also provided that the State would assume the costs of principal and interest payments for public school construction loans incurred by the Counties and Baltimore City prior to June 30, 1967. Funding for these future costs as well as principal and interest costs on the State Public School Construction and Capital Improvement Loans passed by the legislature in 1971 and 1972 is provided through General Fund Appropriations made to the Department of Education in the School Building Construction Aid Program and transferred to the Annuity Bond Fund Account. If there is not enough revenue from sources indicated above to cover principal and interest, the difference must be included by the State in the Real and Personal Property Tax levy.

Of the \$995,251,071.95 bonds authorized but unissued \$362,582,068.55 or 36.4 per cent represent appropriations for State-owned projects. The remaining 63.6 per cent is for various local public and private facilities including schools, community and private colleges, water and sewerage projects and mine reclamation.

During the 1972 session of the General Assembly, total bonds authorized to finance capital outlays aggregated \$474,585,500, an increase of 70.9% as compared to the bonds authorized the preceding year. Of this sum, \$371,175,000 in bonds were authorized for non-State-owned improvements; \$181,025,000 in bonds were so allocated in 1971; \$90,250,000 in 1970 and \$123,385,000 in 1969.

The table shown below reflects the growth in the State's outstanding debt during the past five years, both in total and excluding the loans not supported by the State property tax; i.e., those loans which will be repaid to the State. The latter loans outstanding as of June 30, 1972 totalled \$415,876,000 and account for 47% of the total outstanding debt.

Ending June	Total Debt Outstanding	Increase Since 1967 Fiscal Year	Per Cent Increase	Debt Outstanding Excluding Loans Not Supported By State Property Tax	Increase Since 1967 Fiscal Year	Per Cent Increase	Per Cent of Total
1972	\$876,176,000	\$434,008,000	98	\$460,300,000	\$221,573,000	93	53
1967	442,168,000			238,727,000			54

The above table discloses that the total State debt outstanding as well as the debt incurred that is supported by the State property tax, have each increased during the past five years by 98% and 93% respectively or about 19% and 18% respectively per year. In juxtaposition thereto the assessable base during the same period has steadily increased from \$14,181,962,000 for taxable year 1967 to \$21,565,501,000 for the taxable year 1973 at an average annual rate of approximately 10%. Currently, the ratio of total State debt to the assessable base is 4.06%.

During the 1972 fiscal year, there were three sales of State general obligation bonds totalling \$204,040,000. The net interest cost on the bonds paid decreased from 5.2872% in October, 1970 to 4.1110% in October, 1971. The latest Bond sale in July 1972 reflected a rate of 4.5255% increasing from 4.29739% in February, 1972.

The following tabulation shows the variation in the net interest costs to the State on each sale of bonds between July, 1967 and July, 1972.

Bond Sales & Interest Cost

<u>Date of Bond Sale</u>	<u>Net Interest Cost</u>
July 1972	4.5255%
February 1972	4.29739
October 1971	4.1110
July 1971	4.97257
March 1971	4.1964
December 1970	4.3868
October 1970	5.2872
July 1970	6.028
April 1970	5.232
January 1969	4.325
July 1968	3.949
January 1968	4.224
July 1967	3.667

Other pertinent fiscal data are reported below:

Assessable Base and State Property Tax Rate

Taxable Year	Fiscal Year	Assessable Base	Per Cent Annual Increase	Per Cent Increase Since 1968 Fiscal Year	State Property Tax Rate Per \$100 Of Assessed Valuation
1973	1973	\$21,565,501,000	7.9	42.2	21.00¢
1972	1972	19,981,045,000	8.0		18.00
1971	1971	18,496,971,000	8.5		18.00
1970	1970	17,050,440,000	8.4		20.00
1969	1969	15,715,956,000	3.6		17.00
1968	1968	15,165,300,000	6.9		17.00

Ratio of Debt Outstanding to Assessed Valuation of Property

Fiscal Year Ending June 30	Total Debt Outstanding As a Per Cent of Assessed Valuation
1972	4.06
1971	3.90
1970	3.07
1969	3.30
1968	3.16

Debt Retirement

Fiscal Year Ending June 30	Total Debt Retirement	Debt Retirement Excluding Public School Construction and Other Loans Not Supported By State Property Tax
1973	\$51,017,000	\$27,910,000
1972	48,696,000	29,518,000
1971	42,226,000	20,092,000
1970	39,166,000	17,511,013
1969	34,178,000	14,827,421

Disbursement for Debt Service

Fiscal Year Ending June 30	Redemption and Interest On Total Debt Outstanding	Debt Service Charges Being Repaid the State	Redemption and Interest Excluding Public School Construction and Other Loans Not Supported By State Property Tax
1973	\$86,719,399	\$39,656,956	\$47,062,443
1972	80,096,974	30,759,641	49,337,333
1971	62,495,891	28,932,508	33,563,383
1970	58,277,133	24,954,481	33,322,652
1969	50,249,532	21,074,395	29,175,137

Highlights:

The fiscal data reported herein disclose the following pertinent facts:

	Fiscal Year June 30, 1972	Fiscal Year June 30, 1971
1. Total State Debt Outstanding	\$ 876,176,000	\$ 720,832,000
Supported by State Property Tax	\$460,300,000	\$457,558,000
Not supported by State Property Tax	415,876,000	263,274,000
Total Bonds "Authorized but Unissued"	995,251,072	745,570,970
Supported by State Property Tax	556,680,011	514,545,907
Not supported by State Property Tax	438,571,061	231,025,000
Total State Debt Already Authorized	\$1,871,427,072	\$1,466,402,970

2.	Total General Obligation Bonds Authorized By General Assembly (1972-1970)	Non-Repayable Grants	State Facilities	Use Of State's Credit (Repayable)
	\$912,202,500	\$105,605,000	\$295,097,500	\$511,500,000

Apropos of the aforementioned, it should be noted that State bonds authorized for the construction of non-State-owned facilities increased as follows:

Three Year Period	Amount
1972-1970	\$677,105,000
1971-1969	376,085,000
1970-1968	369,195,000

3.	Outstanding Total State Debt	Fiscal Year 1972	Fiscal Year 1967	Increase	Per Cent Increase
		\$876,176,000	\$442,168,000	\$434,008,000	98
(a)	Supported by State Property Tax	460,300,000	261,657,800	198,642,200	76
(b)	Not Supported by State Property Tax	415,876,000	180,510,200	235,365,800	130

4. Bonds Authorized But Unissued—June 30, 1972:

Total	Non-State-Owned Facilities	Per Cent	State-Owned Facilities	Per Cent
\$995,251,072	\$585,309,201	59	\$409,941,871	41

The figure of \$585,309,201 for Non-State-Owned facilities represents an increase of 46% over the previous year.

The State's assessable base continues its steady growth having advanced from \$15,165,300,000 for taxable year 1968 to \$21,565,501,000 for the current taxable year 1973. The increase has been, at an average rate, approximately seven per cent per year. Since 1968 taxable year, the assessable base has increased 42.2 per cent. This steady growth in the assessable base indicates the sound growth of the overall economy of the State.

The ratio of debt outstanding to the assessable base as of June 30, 1972 was 4.06 per cent. During the last five years this ratio has increased from 3.16 per cent in 1968 to 4.06 in 1972.

5. Bond Retirements and Disbursement for Debt Service:

During the 1973 fiscal year, State general obligation bonds in the amount of \$51,017,000 will be retired, of which \$27,910,000 represents bonds serviced by the State Property Tax. Disbursements for debt service (redemption and interest) during this period will total \$86,719,399. Of this amount \$39,656,956 represents debt service charges being repaid the State.

The fiscal position of the State remains healthy as indicated by the continuance of the triple "A" rating assigned to the State's latest bond issues.

In conclusion, to effectively fulfill the ever increasing needs for State-Owned facilities and to insure a measure of stabilization in the State's structured indebtedness, careful attention should be given to (1) the total bonds "Issued and Outstanding" (State and non-State-Owned facilities), (2) the magnitude of total bonds "Authorized but Unissued" (potential debt), (3) the issuance of bonds to provide direct grants to non-State-Owned facilities, (4) further extension of the use of the State's credit to local subdivisions and/or sanitary districts and medical facilities and, (5) maximum use of pay-as-you-go funding as an alternative to general obligation bond financing.

PART II

CAPITAL BUDGET FOR 1974 FISCAL YEAR

PART II

CAPITAL BUDGET FOR 1974 FISCAL YEAR

The 1974 Fiscal Year Capital Budget proposed by the Governor is presented in detail in this section. Summaries by department and by major function are included. Where significant, the impact of this capital budget on the future operating budget of the State has been included.

1974 CAPITAL BUDGET

The 1974 Capital Budget consists of 151 individual projects totalling \$95,703,700. Fourteen of these projects amounted to 66% of the total. Higher and Special Education, one of six areas to which State monies are provided, received 65% of the total. Together with other funds requested, the State has endeavored to provide facilities where none existed and to upgrade existing facilities in line with accepted standards.

Some of the more significant projects recommended are: Preliminary plans for a State Office Building and an Executive House in Annapolis; planning for a State Office Building and District Court Buildings; Construction of an Armory at Easton; Construction of Community Correctional Centers in Baltimore City and Prince George's County; Construction of an Adult Maximum Security Institution (400 beds); Construction of a Western Maryland Regional Mental Hospital (250 beds); Alteration to the New Unit Building, Crownsville State Hospital; Renovation of Bland-Bryant Building, Spring Grove State Hospital; Construction or purchase of four group homes for the mentally retarded; Construction of a School of Medicine Teaching Facility, University of Maryland, Baltimore City Campus; Construction of an addition to Library and an Office-Classroom Building, Coppin State College; Construction of a Physical Education Facility, Salisbury State College; Construction of a Physical Education Facility, Towson State College; and Construction of a High-Powered Transmitting Facility in Annapolis for the Maryland Public Broadcasting Commission.

Other portions of the budget provide details on these projects and a SUPPLEMENT to this report containing preliminary plans for major construction projects will be published as a separate document.

Capital Budget Summary by Department and by Major Function

A departmental summary of the proposed 1974 Capital Budget is as follows:

Department or Agency	PROPOSED 1974 CAPITAL BUDGET	
	Method of Financing	
	Bond Funds	General Funds
Board of Public Works:	\$ 1,572,000	
Annapolis	442,000	
Baltimore	380,000	
General	750,000	
Military Department	671,400	
Department of Natural Resources:	3,256,200	
Parks Service Administration	2,235,600	
Fish Management Administration	1,000,200	
Wildlife Management Administration	20,400	
Department of Health and Mental Hygiene:	19,785,600	
Laboratories Administration	68,300	
Aged and Chronically Ill Services Administration	334,000	
Mental Health Administration	14,871,700	
Mental Retardation Administration	1,168,600	
State Department of Juvenile Services	3,343,000	
Department of Public Safety and Correctional Services:	6,443,000	
Division of Correction	6,233,000	
Patuxent Institution	29,000	
Maryland State Police	181,000	
State Department of Education	3,800	
University of Maryland	29,942,400	
State Colleges	31,407,800	
St. Mary's College of Maryland	140,000	
Maryland School for the Deaf	56,000	
Maryland Public Broadcasting Commission	865,500	
Department of Economic and Community Development:	1,560,000	
Headquarters	1,500,000	
Maryland Historical Trust	60,000	

GRAND TOTAL 1974 CAPITAL BUDGET

APPROPRIATIONS \$95,703,700

By major functions, the proposed 1974 Capital Budget is divided as follows:

Functions	Amount	Per Cent of Total
General Control	\$ 2,243,400	2.3
Natural Resources and Recreation	3,256,200	3.4
Health, Hospitals and Juvenile Services	19,785,600	20.7
Public Safety and Correctional Services	6,443,000	6.8
Higher and Special Education	62,415,500	65.2
Economic and Community Development	1,560,000	1.6
TOTAL	\$95,703,700	100.0

Impact of the 1974 Capital Budget on Future Operating Budgets

In many cases, the projects under consideration here will increase future operating expenses. Departments in the State are required to include an estimate of these increased costs in their project submissions. A summary of this impact is as follows:

Estimated increase in Salaries and Wages	\$ 8,735,770
Estimated increase in Other Operating Expenses	7,344,075
	<hr/>
TOTAL	\$16,079,845

1974 FISCAL YEAR CAPITAL BUDGET

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

BOARD OF PUBLIC WORKS:

(1) Annapolis: (Anne Arundel County)

1. Preparation of preliminary plans and specifications for Construction of a State Office Building \$ 72,000

Estimated increase in operating expense:

Salaries and wages \$ 94,000

Other operating expenses \$220,000

This office building will provide space for State departments which now are housed in rental space. The building will be located near the recently completed power plant. The building will contain approximately 135,000 gross square feet of space. Underground parking will be provided in the structure.

2. Preparation of preliminary plans and specifications for Construction of the Executive House .. 45,000

Estimated increase in operating expense:

Salaries and wages \$ 90,000

Other operating expenses \$165,000

This building will house the Governor's staff agencies and contain offices for the cabinet members. The building will contain approximately 100,000 gross square feet of space.

3. Install electrical and mechanical improvements in the Senate Office Building 325,000

The project will connect the air condition system of the building to the chilled water from the new boiler plant, install mixing box units to connect the building to the plant's hot water system, replace the electrical switch gear and convert to 15KV. Deteriorated piping in the building will be replaced where necessary.

Total—Annapolis \$ 442,000

(2) Baltimore: (Baltimore City)

1. To supplement the appropriation "Planning and preparation of detailed plans and specifications

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

BOARD OF PUBLIC WORKS—(Continued) :

Baltimore—(Continued) :

for a second parking garage and office building..." as shown on page 908 of the Acts of 1971; Section 8 of Chapter 425 of the Acts of 1971 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose

\$ 340,000

This project will complete the planning and design of State Building #5 to be located immediately west of the present State Highway Administration Office Building. It will provide office space for agencies now occupying rental space. It is estimated the garage will contain 163,000 gross square feet of space and the office portion of the building will contain 158,000 gross square feet.

2. Design and preparation of detailed plans and specifications for an addition to the food service areas in State Building #1

40,000

Additional cafeteria space will be required in State Building #1 to accommodate the employees working in the Health Laboratory Building—SB #4 when that building is placed in operation in 1974. SB #4 will not have a cafeteria. This project will develop the necessary plans to increase the size of the existing cafeteria sufficiently to accommodate the anticipated increased demand for dining facilities.

Total—Baltimore

\$ 380,000

(3) General:

1. Acquisition of land and/or improvements, and design and preparation of detailed plans and specifications for three (3) District Court Buildings

750,000

The Court Buildings will be the first to be constructed. Sufficient land adjacent to the Court

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

BOARD OF PUBLIC WORKS—(Continued) :

General—(Continued) :

Building will be purchased so State Multipurpose Buildings may be erected at a later date. Among the areas urgently requiring a court building are Upper Marlboro and Elkton. It is proposed that the Court Buildings be amortized from money available to the court system.

Total—General	\$ 750,000
TOTAL—BOARD OF PUBLIC WORKS	\$ 1,572,000

MILITARY DEPARTMENT:

1. Contingent upon and supplementary to federal funds being made available to the Military Department for Construction of an Armory—Easton Area (Talbot County).

(a) Construction	\$ 307,000
Utilities	20,000
Equipment	20,000
(b) Reimbursement of Revolving Preliminary Planning Fund	30,000

This new armory will consolidate the Cambridge armory (built 1917) and the Easton armory (built 1927). It will be the third armory to be built in the Military's program to consolidate their units into facilities located outside of the congested downtown areas. The federal government will fund 75% of the construction costs. This contribution is estimated to be \$451,000.
2. Installation of new wood drill floor, Fifth Regiment Armory, (Baltimore City) 108,000

The armory drill floor has been in use for approximately 40 years. It has worn to the point where it cannot be refinished again. The worn and deteriorated condition of the floor reduces the opportunity to rent the armory for civic functions. Approximately \$25,000 is received annually from the rentals.
3. Replace the Main Electrical Switchboard, Fifth Regiment Armory, (Baltimore City) 78,400

The present electrical switchboard was installed in 1933. It breaks down frequently and is expensive to repair. Parts are not available and must be hand fabricated. The switchboard is required to control the power supply to the armory.
5. Acquisition of land (approximately 10 acres) and the design and preparation of detailed plans and specifications for the Construction of an Armory, Denton—Centerville area, (Caroline and Queen Anne's Counties) 108,000

PROPOSED CAPITAL BUDGET

Method of Financing	
<u>Bond Funds</u>	<u>General Funds</u>

MILITARY DEPARTMENT—(Continued) :

This proposed new armory will replace the Denton armory (built 1938) and the Centerville armory (built 1926). It will be the fourth new armory in the Military Department's unit consolidation program. Federal funds will finance 75% of the construction costs. The two existing armories will be available for sale when the construction of the new armory is completed.

TOTAL—MILITARY DEPARTMENT	\$ 671,400
---------------------------------	------------

DEPARTMENT OF NATURAL RESOURCES:

PARKS SERVICE ADMINISTRATION:

The Maryland park facilities are unable at the present time to accommodate the total demand for recreation. The shortage of facilities is especially pronounced during the summer season. Attendance at the State parks has increased each year. During fiscal year 1972, approximately 8,890,000 individuals have visited our parks.

The fiscal year 1974 capital requests submitted by the Department of Forests and Parks consisted of development and planning projects with a total estimated cost of \$6,497,000. Subsequent to the submission, the department withdrew \$3,211,000 of the requests which could not be placed under contract during the upcoming fiscal year.

As of November 20, 1972, there was \$12,094,900 remaining unencumbered for development from prior appropriations. Of this amount, approximately \$5,000,000 was authorized by the General Construction Loan of 1972 and became eligible for expenditure on July 1, 1972. These funds and the funds currently being proposed in the 1974 fiscal year capital budget total \$14,230,000. The recommendations for development and planning contained in this submittal are consistent with the Master Plan of Development.

The estimated increase in operating expenses associated with development projects recommended herein is

Salaries and wages	\$30,500
Other operating expense	97,000

The appropriations listed below for the Department of Natural Resources are recommended for approval:

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

DEPARTMENT OF NATURAL RESOURCES—(Continued):

FISH MANAGEMENT ADMINISTRATION:

(1) Warm Water Fish Hatchery:

(Prince George's and Charles Counties)

Design and first Stage Construction of Warm
Water Fish Hatchery \$ 875,000

Estimated increase in operating expense:

Salaries and wages \$13,700

Other operating expense 25,000

Initial supplies and equipment 20,000

Maryland does not operate a warm water fish hatchery but receives these species of fish from federal hatcheries. With the ever increasing demand for fish, it is desirable for the State to operate its own hatchery, to stock our numerous fishing ponds. Total cost of the fish hatchery is approximately \$3,000,000 and can be divided into four phases. Subsequent phases should be financed by the agency.

(2) Contingent upon and supplementary to federal funds being made available to the Department of Natural Resources for the Construction of St. Mary's County Public Fishing Lake
(St. Mary's County)

125,200

This project to construct a soil conservation and flood control dam was agreed upon previously by the State, County and Federal Governments. It will provide a mutipurpose lake of approximately 250 acres that will be available for public fishing. It also will reduce flooding in the Great Mills area. The federal Soil Conservation Service Administration will fund 73% of the cost. The lake is estimated to cost \$760,000. The State's 27% share will be \$205,000 of which \$80,000 is available from the budget for the Fish Management Administration.

Total—Fish Management Administration \$ 1,000,200

PROPOSED CAPITAL BUDGET

Method of Financing

DEPARTMENT OF HEALTH AND MENTAL HYGIENE

LABORATORIES ADMINISTRATION:

(1) State Central Laboratory (Baltimore City):

24. Equipment for new State Central Laboratory .. \$ 68,300

The laboratory is scheduled for completion late in calendar year 1974. Funds requested herein are required for long lead time items of equipment.

TOTAL—LABORATORIES ADMINISTRATION .. \$ 68,300

AGED AND CHRONICALLY ILL SERVICES ADMINISTRATION:

(1) Deer's Head State Hospital (Wicomico County):

(12.) Installation of a generator of approximately 250 KVA and appurtenances 55,000

This generator will provide emergency electric power to lifesaving equipment, heat, hot water and lighting. The installation is part of the continuing program to provide this service to all State Hospitals.

(12A.) To supplement the appropriation "Installation of additional elevator and completion of renovation of Hospital Building to provide an occupational therapy area and extend central stairwell to third floor" as shown on page 914 of the Acts of 1971; Section 8 of Chapter 425 of the Acts of 1971 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose 120,000

A revised estimate of the costs of the renovation and addition indicated that \$90,000 additional to the funds previously appropriated would be required. In addition, \$30,000 is necessary to replace that part of the 1970 General

Fund authorization which was reverted. An authorization of \$120,000 would allow the completion of this project.

Total—Deer's Head State Hospital	\$ 175,000
--	------------

(2) Montebello State Hospital (Baltimore City) :

(26.) Renovation of Central Core of Ward D-3	69,000
--	--------

In 1968 funds were authorized to renovate the central core area of each ward in the hospital. However, because of escalation factors it became necessary to reduce the scope of work to remain within the authorization. As a result Ward D-3 was deleted from the renovation program. Funds requested herein would provide for the renovation of Ward D-3 by the enlargement of the nursing station, treatment room and medication room, and conversion of the pantry (not now in use) to a needed conference room.

Total—Montebello State Hospital	\$ 69,000
---------------------------------------	-----------

(3) Western Maryland State Hospital (Washington County) :

(41.) Construction of elevator tower and installation of patient elevator	90,000
---	--------

Estimated increase in operating expense:

Salaries and wages	None
--------------------------	------

Other operating expense	\$ 3,300
-------------------------------	----------

The two elevators now installed in this 3-story hospital are unable to service properly the demands of the patients, visitors and staff. This situation is aggravated by the large requirements for the elevators by the dietary and linen services. An additional elevator will relieve this problem and allow more efficient delivery of all services to the patients.

Total—Western Maryland State Hospital	\$ 90,000
---	-----------

TOTAL—AGED AND CHRONICALLY ILL

SERVICES ADMINISTRATION	\$ 334,000
-------------------------------	------------

DEPARTMENT OF HEALTH AND MENTAL HYGIENE—(Continued) :

MENTAL HEALTH ADMINISTRATION:

(1) Headquarters:

- (7.) Construction of Western Maryland Regional Mental Hospital, including air conditioning (250 beds), contingent upon approval of preliminary plans by the Department of General Services and the Department of State Planning (Allegany County) :

Construction	\$ 8,654,750
Utilities	300,000
Site improvements	445,250

Estimated increase in operating expense:

Salaries and wages	\$ 2,722,000
Other operating expense	626,800

Construction of this hospital on land obtained by Allegany County will provide facilities for patients currently housed in Sylvan Retreat, and also alleviate some of the overcrowded conditions in Springfield State Hospital. The new hospital, which will be located near the Community College and the County Health Center, will serve the Western Maryland Region with programs for 24 children and adolescents; 90 adult psychiatric patients; 100 geriatric patients; 24 alcoholic patients; and a 12-bed infirmary. Facilities will also be provided for administration, maintenance, patient activities and other support functions.

- (7A.) To supplement the appropriation "Construction of a Comprehensive Community Mental Health and Retardation Center, Baltimore (200 beds)" as shown on page 1678 of the Acts of 1967; and to supplement the appropriation "To supplement the appropriation 'Construction of a Comprehensive Community Mental Health and Retardation Center Baltimore (200 beds)'..." as shown on page 504 of the Acts of 1972; Section 8 of Chapter 759 of the Acts of 1967 and Section 8 of Chapter 179 of the Acts of 1972 being hereby modified to the extent that said

DEPARTMENT OF HEALTH AND MENTAL HYGIENE—(Continued)

MENTAL HEALTH ADMINISTRATION—(Continued) :

work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose

\$ 700,000

GCL 1967 and GCL 1972 authorized \$10,926,400 for construction of this facility, but the sum is not sufficient to meet the bids. To close the gap, \$625,000 of additional Federal (Hill-Burton) funds were allocated, as well as making modifications and deletions in the program. The modifications, which have been approved by appropriate Federal and City Agencies, reduce the capacity to 182 beds rather than 200 beds as originally planned. The funds requested herein would restore the following deleted items: fixed equipment, landscaping and parking lot, and provide contingency funding.

Total—Headquarters \$10,100,000

(2) Crownsville State Hospital (Anne Arundel County) :

(1.) Installation of fire prevention facilities in various buildings 101,500

Funds recommended will correct deficiencies specified by the State Fire Marshal in the Nurses' Home, Attendants' Home, Maintenance Service Building and the Civil Defense Storage Area.

(13.) Installation of an emergency diesel generator of about 300 KW and study to determine the need for additional emergency generators 100,000

The diesel generator will provide emergency electric power to the Medical-Surgical Building and adjacent buildings. The study will develop a program for installing additional emergency electric power where required.

(23.) Alterations to the New Unit Building, including air conditioning 1,728,000

DEPARTMENT OF HEALTH AND MENTAL HYGIENE—(Continued)

MENTAL HEALTH ADMINISTRATION—(Continued):

Crownsville State Hospital—(Continued):

Estimated increase in operating expense:

Salaries and wages	\$	35,000
Other operating expense		16,500

The New Unit Building, which was constructed in 1942, is deficient in dining facilities as well as being unsatisfactory with regard to heating and ventilation. The alterations will correct these deficiencies, and provide a capability for modern concepts of treatment for the chronic, physically disabled and alcoholic patients. Proper care for these patients requires installation of a new elevator, tiling unsanitary porous concrete floors, installation of dining facilities and improvements in the interior layout. The capacity of the building will be reduced from 180 to 100 by the modernization.

- (32.) Replacement of hot and cold water lines in the Meyer Building and steam piping lines in Men's Dormitory \$ 170,000

The extent of failures in the domestic water lines and steam piping in these buildings indicates extensive deterioration and the need for complete renewal. Funds to prepare detailed plans and specifications for their replacement were authorized last year.

Total—Crownsville State Hospital \$ 2,099,500

- (3) Eastern Shore State Hospital (Dorchester County):

- (3A.) Construction for shoreline erosion control 140,000

The rate of shoreline erosion has increased greatly since the construction of jetties and sea-walls to the property adjoining the west side of the hospital. Recent erosion has washed away large trees and other vegetation which had previously contained the embankments. Approval of this project will permit construction of a concrete revetment to protect approximately 1,200

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

DEPARTMENT OF HEALTH AND MENTAL HYGIENE—(Continued)

MENTAL HEALTH ADMINISTRATION—(Continued) :

Eastern Shore State Hospital—(Continued) :

feet of shoreline. The method of erosion control which was recommended by the Department of Natural Resources is to extend the existing seawall and certain existing groins.

- (34.) Design and preparation of detailed plans and specifications for construction of roads, sidewalks, curbing, and parking \$ 25,000

The road system has parts which are too narrow, unpaved sections and one section subject to flooding. This project is to determine the work necessary to correct existing deficiencies in the roads, sidewalks, curbing and parking.

Total—Eastern Shore State Hospital \$ 165,000

(4) Springfield State Hospital (Carroll County) :

- (2) Installation of fire prevention facilities in various buildings 358,600

Funds recommended will correct deficiencies specified by the Fire Marshal in Warfield D and E wards, auditorium, cafeteria and occupational therapy shop; Geriatric Building; Men's Cafeteria, M ward, Service Building and occupational therapy shop.

- (20A.) To supplement the appropriation "Study and preparation of detailed plans and specifications for necessary improvements to steam and water lines to Warfield Division, Geriatrics Building, and Men's Building . . ." as shown on page 505 of the Acts of 1972; Section 8 of Chapter 179 of the Acts of 1972 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose 40,000

DEPARTMENT OF HEALTH AND MENTAL HYGIENE—(Continued)

MENTAL HEALTH ADMINISTRATION—(Continued):

Springfield State Hospital—(Continued):

A planning appropriation of \$10,000 was authorized by GCL 1972 for this project; however, conference with the consulting engineers revealed that the authorization is insufficient to perform the necessary investigation and design for the entire project. A supplement of \$40,000 is required to provide the detailed plans for necessary improvements and renovation of all main steam, hot and cold water lines in 4,300 feet of tunnels having 6 lines and 7,800 feet of tunnels having 2 lines.

- (31.) Construction of roads, sidewalks and parking areas (third phase) \$ 81,200

A master plan has been developed for necessary construction of roads, sidewalks, and parking areas determined to be required for safety of patients and to provide sufficient roadways and parking for employees and visitors. The plan is being implemented over a 5 year period in order of priority. This project is the third of a total of 5 phases.

Total—Springfield State Hospital \$ 479,800

(5) Spring Grove State Hospital (Baltimore County):

- (3.) Installation of fire protection facilities in various buildings 392,900

Funds recommended will correct deficiencies specified by the State Fire Marshal in Hamilton, White and Dayhoff Buildings.

- (14.) Installation of emergency generators and appurtenances 116,000

The hospital facilities have been divided into seven groups, each with an emergency genera-

DEPARTMENT OF HEALTH AND MENTAL HYGIENE—(Continued)

MENTAL HEALTH ADMINISTRATION—(Continued) :

Spring Grove State Hospital—(Continued) :

tor, to provide emergency electric power. Funds were authorized for five generators in FY '73. This request will permit installation of generators for the Stone Cottage Group and Red Brick Cottage Group to complete the program at Spring Grove.

- (20.) Equipment for new Medical-Surgical Building .. \$ 124,600
The new Medical-Surgical Building is scheduled for completion in October 1974. Funds recommended herein are required for the necessary equipment to place the facility in operation.

- (22.) Renovation of Bland-Bryant Building, including installation of air conditioning:
- | | |
|-------------------------|-----------|
| Construction | 1,230,000 |
| Utilities | 110,000 |
| Site improvements | 30,000 |

Estimated increase in operating expense:

Salaries and wages	\$ 478,100
Other operating expense	36,800

Plans have been completed for the renovation of Bland Bryant Building. Although the building is about 40 years old, it is structurally sound and suitable for alterations. This project will permit modernizing the building and utilities, and will provide separate bedrooms of 2 to 4 beds each for 156 geriatric patients. Presently, the building is licensed for 360 patients in large, overcrowded dormitory areas.

- (36.) Designed and preparation of detailed plans for replacement of outdoor electrical distribution system 20,000

It is the view of the Department of General Services that the outdoor electrical distribution

Headquarters—(Continued):

- (17.) Equipment for Regional Mental Retardation Center—Eastern Shore (250 beds) (Wicomico County) \$ 236,000
- The project is scheduled for completion during fiscal year 1974. Equipment is required to place the facility in operation when it is completed.

Total—Headquarters \$ 556,600

(2) Rosewood State Hospital (Baltimore County):

- (11.) Installation of a generator of approximately 370 KVA including automatic switching gear and construction of a shelter 110,000

This generator will provide emergency electric service required to maintain power, heat and lighting for the patients in Severely Retarded Buildings I, II, and III and Spastics Building I through VI. This is the third part of a seven phase program to provide emergency power throughout the hospital, and is based on an engineering study completed in 1969.

- (18.) Design and preparation of detailed plans and specifications to renovate the Benzinger Building 10,000

Benzinger Building houses that portion of the female population at Rosewood which is classified as "behavioral problems." The building suffers from poor heating and ventilation systems, deteriorated flooring, inadequate lighting and a poor layout for training the residents. Funding this project would permit the planning necessary to correct the building deficiencies as well as to provide areas required for therapy and training within the building.

- (27.) Study and preparation of detailed plans and specifications for necessary improvements of underground utilities 35,000

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

DEPARTMENT OF HEALTH AND MENTAL HYGIENE—(Continued)

MENTAL RETARDATION ADMINISTRATION—(Continued) :

Rosewood State Hospital—(Continued) :

This study would determine the extent of deterioration and develop the plans to correct it. The area involved in the study has over 46,500 feet of steam and condensate lines of various sizes.

- (28.) Renewal of domestic water lines in various patient buildings \$ 187,000

The domestic waterlines throughout much of the hospital have deteriorated with rust and corrosion. A time phased replacement will be made on the basis of the study and planning authorized by the Fiscal Year 1973 capital budget.

- (39.) Razing of King Cottage 45,000

Estimated increase in operating expense:

Salaries and wages None
Other operating expense (—)\$6,000

As the inpatient population of Rosewood continues to decline, it becomes possible to vacate King Cottage. This 3-story building has been in use for 60 years and is no longer appropriate for patient living nor practical to convert to other use.

Total—Rosewood State Hospital \$ 387,000

- (3) Great Oaks Center (Montgomery County) :

- (16.) To supplement the appropriation "Second phase construction for Mental Retardation Center (270 beds) . . ." as shown on page 338 of the Acts of 1970; and to supplement the appropriation "To supplement the appropriation "Second phase construction for Mental Retardation Center (270 beds)' . . ." as shown on page 918 of the Acts of 1971; Section 8 of Chapter 101 of the Acts of 1970 and Section 8 of Chapter 425

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES:

DIVISION OF CORRECTION:

(1) Headquarters:

- (1) Construction of a Community Correctional Center (108 beds) in Prince George's County subject to the approval of plans by the Department of General Services and the Department of State Planning. Any federal funds received by the Division of Correction for this project will serve to reduce this appropriation.

(Prince George's County)

Construction	\$ 1,750,000
Utilities	75,000
Site improvements	175,000

Estimated increase in operating expense:

Salaries and wages	\$ 448,800
Other operating expense	166,500
Initial supplies and equipment ..	77,600

This will be the first Community Correctional Center. The site for the center is to be provided by Prince George's County. Federal funds are available for the preparation of plans for the project. The facility will contain approximately 47,000 gross square feet and house 108 residents in three (3) cottages. A service building will provide space for recreation, visiting, medical, food services, education and administration functions. Each resident will be enrolled into a specific program tailored to fit his individual need.

- (5) Construction of a Community Correctional Center (approximately 108 beds) in Baltimore City subject to the approval of plans by the Department of General Services and the Department of State Planning. Federal funds received by the Division of Correction for this project will serve to reduce this appropriation.

(Baltimore City)

Construction	1,750,000
Site improvements	175,000

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES—

(Continued):

DIVISION OF CORRECTION—(Continued):

Headquarters—(Continued):

Estimated increase in operating expense:

Salaries and wages	\$ 404,600
Other operating expense	165,800
Initial supplies and equipment ..	77,600

The concept and lay out of this center will be similar to the Prince George's unit. If a separate site is not available for this unit, the center will be constructed by converting the space currently occupied by Headquarters, Division of Correction into a Correctional Center. Federal funds are available for preparation of plans for this project. There will be some federal funds available to defray a portion of the construction costs. These two centers will assist in reducing the crowded condition at the House of Correction.

- (9) Contingent upon preliminary plans being approved by the Department of General Services and Department of State Planning—Design and preparation of detailed plans and specifications for Construction of a Maximum Security Institution (400 beds) \$ 500,000

Estimated increase in operating expense:

Salaries and wages	\$2,425,000
Other operating expense	824,800
Initial supplies and equipment ..	198,600

The Division of Correction with the assistance of an architectural consultant has developed a concept and schematic design for the proposed Maximum Security Institution. Detailed plans must now be developed for this new facility. The institution will contain approximately 230,000 square feet of space. The inmates will be housed in 36 man separate security units. Emphasis will be placed on behavioral change, an education program and vocational training in the printing profession.

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES—
(Continued) :

DIVISION OF CORRECTION—(Continued) :

Headquarters—(Continued) :

- (13) Acquisition of land for second Community Correctional Center - Baltimore City \$ 200,000

Baltimore City should support approximately six (6) Community Correctional Centers to house the short-term, nonaggressive inmates whose home is in Baltimore City. The project will fund the acquisition of sufficient land, on which to locate a second Correctional Center. Each resident at the center will be enrolled into a program that is tailored to fit his specific requirement.

- (13A.) Design and preparation of detailed plans and specifications to convert the Correctional Camps at Church Hill and Hughesville, Maryland into Community Correctional Centers with lock-up facilities. Any federal funds received by the Division of Correction for this project will serve to reduce this appropriation. (Charles and Queen Anne Counties) 100,000

The project will convert the Church Hill and Hughesville Correctional Camps into Community Correctional Centers with a security lockup to house pretrial confinees. This State run lockup will allow the inadequate county lockups in the vicinity of the camps to be closed. Each county will reimburse the State for those offenders they confine in the lockup. The Correctional Center portion of the camp will be operated under the same concept as the other Correctional Centers.

Total—Headquarters \$ 4,725,000

- (2) Maryland House of Correction:
(Anne Arundel County)

- (17) Construct new facilities and relocate existing utilities underground 150,000

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES—
(Continued):

DIVISION OF CORRECTION—(Continued):

Maryland House of Correction—(Continued):

This is the second and final stage of the program to relocate and protect the utility systems so that they cannot be seized by the inmates at the institution. When this work is completed, the control of the utilities will be managed from a protected area that is not accessible to the inmates.

- (27) Renovate the shower facilities in "H", "I" and "J" Dormitories \$ 210,000
The project will renovate the showers in three dormitories that house approximately 1,000 inmates. The showers are inoperable much of the time and severely limit the number of showers that can be taken.

- (32) Install high pressure water system:
Construction 200,000
Utilities 50,000

The proposed high pressure water system will be used to fight fires. It also can be used to quell disturbances at the institution. A separate 12 inch high pressure waterline and booster pump must be installed to raise the water pressure to 100-120 foot pounds.

- (31) Design and preparation of detailed plans and specifications to install exhaust system in the wood shop 7,500
A modern dust collecting exhaust system is required to make more effective use of the wood shop and to eliminate wood dust from the air. With the existing system, an excessive amount of fine wood dust escapes into the air from the system and it is necessary to cease work every hour for 15-20 minutes to empty the dust bags. The shop employs an average of 110 people.

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES—
(Continued):

DIVISION OF CORRECTION—(Continued):

Maryland House of Correction—(Continued):

- (34) Design and preparation of detailed plans and specifications to construct a new Ice and Refrigeration Systems \$ 10,000

Estimated increase in operating expense:

Salaries and wages None

Other operating expense \$7,000

The present refrigeration system is old, well-worn and located in three separate locations. During the summer, its ice making facilities often break down and are not able to accommodate the demand for iced drinks. Food must be handled several times which creates a requirement for additional dietary officers. This proposed new refrigeration facility will improve the efficiency of the kitchen force.

Total—Maryland House of Correction \$ 627,500

- (3) Maryland Penitentiary:
(Baltimore City)

- (14) Install air conditioning in Prison Hospital 240,000

Estimated increase in operating expense:

Salaries and wages None

Other operating expense \$ 2,000

Planning funds were authorized for this project in GCL 1972. The project will air condition the ward area where the severely ill inmates of the correctional system are treated. The critically ill patients are transferred to University Hospital.

Total—Maryland Penitentiary \$ 240,000

- (4) Maryland Correctional Institution
Hagerstown: (Washington County)

- (33) Install ventilation system in the Cannery 85,000

Estimated increase in operating expense:

Salaries and wages None

Other operating expense \$ 1,000

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES—

(Continued) :

DIVISION OF CORRECTION—(Continued) :

Maryland Correctional Institution—(Continued) :

The cooking process at the cannery increases the humidity in the facility. This humidity causes rapid deterioration of the building. The proposed ventilation system will exhaust the moist air thereby eliminating the condition that causes the deterioration.

Total—Maryland Correctional Institution—Hagerstown \$ 85,000

(5) Maryland Correctional Institution for Women—
Jessup: (Anne Arundel County)

(24) Renovate "C" Cottage 375,000

Estimated increase in operating expense:

Salaries and wages None

Other operating expense \$15,000

Planning funds for this project were authorized in GCL 1972. This will be the second cottage to be renovated. The cottage was constructed in 1941 with a rated capacity of 42. Since the building was erected during World War II, many substitute items of material were used in its construction. The water, electrical, heating and plumbing systems have deteriorated to the point where a complete renovation is required. The project will correct the existing deficiencies.

(24A.) Replace the underground secondary electrical feeder system 26,000

The existing feeder lines are over 30 years old. The boiler replacement project and the renovation of the cottages has created an additional requirement for electricity. This project will provide for additional underground electrical transmission lines to provide this power.

Total—Maryland Correctional Institution for Women—
Jessup \$ 401,000

PROPOSED CAPITAL BUDGET

Method of Financing

(Anne Arundel County)

- (29) Install Refrigeration-Freezer Room at the Community Vocational Rehabilitation and Release Center—Baltimore City \$ 36,000

Estimated increase in operating expense:

Salaries and wages None
Other operating expense \$1,100

No provision was made for refrigeration in the construction of the Release Center. Foods are transported daily from the Camp Center at Jessup. This procedure is costly and very inconvenient. The project will provide for a “bally-box” type refrigeration which will eliminate this problem.

- (22) Construction of All-Purpose Building at the Correctional Camp Center—Jessup
Construction 96,000
Utilities 22,500

Estimated increase in operating expense:

Salaries and wages None
Other operating expense \$1,600

There is no unoccupied space available at the center in the building designed for housing that can be used as classrooms, chapel, visiting rooms and assembly rooms. The proposed 70' x 60' metal structure with movable screens will provide the needed space. It also will enable the center to improve the programs that are conducted for the inmate during off-duty time.

MARYLAND STATE POLICE—(Continued):

likewise requires additional space to house the new troopers and administrative staff needed to cope with their increased missions and the traffic problem in their area. A new site in Prince George's County is required on which to build a barracks similar to the Annapolis Barracks.

- (7) Acquisition of land and preparation of preliminary plans and specifications for Construction of the Golden Ring Barracks—(Baltimore County)

Land acquisition	\$	40,000
Preparation of preliminary plans		10,000

Estimated increase in operating expense:

Salaries and wages	\$13,500
Other operating expense	12,000

The State Police have outgrown the space available in the State Highway Administration Building near Brooklandville. They wish to relocate the barracks near the center of its zone of responsibility. The police are exploring the availability of excess State Highway land as the new site for the Golden Ring Barracks.

- (10) Acquisition of land and preparation of preliminary plans and specifications for the Construction of Emergency Operations Vehicle Course (Howard County)

Land	1,000
Preparation of preliminary plans	10,000

Estimated increase in operating expense:

Salaries and wages	None
Other operating expense	\$1,250

It is proposed to locate this driver's course on State-owned land between Patuxent Institution and Waterloo Barracks. The course is to pose a series of difficult driving problems that a trooper will face on the road. The site is available for transfer to State Police. The proposed

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES—
(Continued):

MARYLAND STATE POLICE—(Continued):

project will plan the layout of the driver's course and finance the land transfer fees.

- (15) Acquisition of land for Howard County Barracks (Howard County) \$ 10,000

State Police wishes to acquire a plot of land from the State Highway Administration for the Howard County Barracks. The land is excess to the needs of the State Highway Administration. State Police desire to have the title to the land transferred to them so they can commence planning for construction. The cost of the property will be the initial acquisition price to the Highway Administration plus interest charges to the date of transfer.

- (2A.) To supplement the appropriation "Construction of addition to Bel Air Police Barracks: . . ." as shown on page 922 of the Act of 1971; Section 8 of Chapter 425 of the Acts of 1971 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose 60,000

The funds appropriated by GCL 1971 were insufficient to complete the construction work in the basement. Partitions, cells, flooring and electrical work in the basement were alternates to the basic contract and were eliminated. This project provides sufficient funds to complete the construction of the addition.

TOTAL—MARYLAND STATE POLICE \$ 181,000

TOTAL—DEPARTMENT OF PUBLIC SAFETY

STATE DEPARTMENT OF EDUCATION:

(1) Maryland Rehabilitation Center (Baltimore City):

1. Contingent upon and supplementary to federal funds being made available to the State Department of Education for the design and preparation of detailed plans and specifications for an Automotive Training Center. \$ 3,800

In the original planning for the Maryland Rehabilitation Center, it was thought best to provide for the automotive training program in a separate structure because of noise, fumes, and dust. The experience of other centers indicates that the automotive program is one of their most popular vocational training areas and a survey in Maryland reveals that there is a great need for this facility as part of the MRC's program. It is anticipated that federal funds will provide for one-half of the total estimated cost of \$285,500 for this facility.

TOTAL—STATE DEPARTMENT OF EDUCATION	\$	3,800
-------------------------------------	----	-------

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

UNIVERSITY OF MARYLAND:

(1) College Park (Prince George's County):

1. Equipment for the Biochemistry Building \$ 650,700
 GCL 1972 provided \$604,900 for installed or built-in equipment for this facility. To award the contract it was necessary to utilize approximately \$400,000 of these funds. Therefore, this request is to restore these funds and provide the moveable equipment required to place the facility in operation.

2. Equipment for new Lecture Hall Addition to Mathematics Building 63,600
 Funds requested herein are required to purchase moveable equipment to place this facility in operation.

5. Construction of an addition to the Industrial Education Building 2,747,700
 Estimated first-year increase in operating expense:

Salaries and wages \$ 31,900
 Other operating expense 46,600
 Initial supplies and equipment 510,000

Total \$588,500

The present structure, Patterson Hall, which houses the Department of Industrial Education, was built for a department with a maximum of 400 student majors. The department now has 471 undergraduate majors and 135 graduate majors. This department conducts the only program in the State to qualify vocational-industrial teachers. To relieve the present overcrowding and satisfy needs of the department for the foreseeable future, funds are requested to construct this 46,500 gross square feet addition and convert portions of the existing building to be compatible with the new structure.

6. Preparation of preliminary plans and specifications for renovation of and fourth floor addition to the Engineering Classroom Building 75,000

UNIVERSITY OF MARYLAND—(Continued) :

College Park—(Continued) :

Estimated increase in first-year operating expense:

Salaries and wages	\$ 36,900
Other operating expense	103,500
Initial supplies and equipment	54,500
<hr/>	
Total	\$194,900

The College of Engineering urgently requires additional space and there is also a need to upgrade the existing building which is one of the oldest buildings on the campus which has not had a major renovation. To make the present structure functional, many changes are required. The addition of a fourth floor will provide about 17,740 assignable square feet to relieve the space problem. The addition will further provide for the accommodation of the Fire Protection Curriculum, now unsatisfactorily housed elsewhere. Funds requested will permit the preparation of preliminary plans for this very worthwhile project.

9. To supplement the appropriation "Planning and preparation of detailed plans and specifications for conversion of Dining Hall No. 1, including air conditioning" as shown on page 1018 of the Acts of 1969; Section 8 of Chapter 409 of the Acts of 1969 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose \$ 65,000

Estimated first-year increase in operating expense:

Salaries and wages	\$ 44,800
Other operating expense	81,000
Initial supplies and equipment	200,000
<hr/>	
Total	\$325,800

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

UNIVERSITY OF MARYLAND—(Continued) :

College Park—(Continued) :

The construction of a large food service facility on the campus began in the late fall of 1971. This facility is designed to replace Dining Hall No. 1 which has been used for many years. Although this building is solid and well-built, it is not configured to a modern food service facility and the cost to redesign the building for that purpose would be prohibitive. It can, however, be converted to an academic facility which will serve admirably to provide additional space needs. GCL 1969 provided \$85,000 for planning and this request is for the remainder of the funds required to complete the detailed plans and specifications for this structure.

15. Extension of utilities \$ 835,200

With new construction on this campus comes the requirement to extend utilities to these facilities. This project also includes correction of deficiencies in sanitary and storm sewers and extension of utilities of increased capacity to areas of need.

16. Site improvements 318,000

This project includes additional funds for sedimentation and erosion control, site improvements to new facilities and planning funds to develop campus road projects in coordination with the State Highway Administration and the Campus Master Planners.

Total—College Park \$ 4,755,200

(2) Baltimore City Campus:

2. Renovation of University Hospital, Phase I 3,493,000

Design and preparation of detailed plans and specifications for Phase II 95,000

PROPOSED CAPITAL BUDGET

Method of Financing	
<u>Bond Funds</u>	<u>General Funds</u>

UNIVERSITY OF MARYLAND—(Continued) :

Baltimore City Campus—(Continued) :

Estimated first-year increase in operating expense:

Salaries and wages	\$ 12,800
Other operating expense	7,600
Initial supplies and equipment	316,300
<hr/>	
Total	\$336,700

In GCL 1971 and GCL 1972, \$195,000 was appropriated for the preparation of plans to renovate the existing University Hospital. The construction of the North Hospital Building is planned so that each floor of this new building will be joined to a floor of the existing hospital at the end of "A" Wing. Numerous changes in space allocations in the existing hospital will be required as activities move, consolidate or expand. Approximately 53,800 gross square feet of space is included in Phase I and an additional 33,100 square feet is planned for renovation and conversion in Phase II. Funds requested for Phase I also include provision of the addition of a Security Wing on the fifth floor level of the Psychiatric Institute.

3. Construction of a School of Medicine Teaching Facility \$17,841,400

Estimated first-year increase in operating expense:

Salaries and wages	\$ 76,800
Other operating expense	403,300
Initial supplies and equipment	480,000
<hr/>	
Total	\$960,100

In a detailed study entitled "Proposed Expansion to 200 Entering Students, School of Medicine," prepared in September 1971 at the request of Governor Mandel, a thorough analysis was made of available and needed space. The University's facilities were compared with space available to other medical schools of varying

UNIVERSITY OF MARYLAND—(Continued) :

Baltimore City Campus—(Continued) :

sizes. These studies indicate a minimum need of 520,000 net square feet of floor space for medical school use if the entering class is to be expanded to 200 students. Completion of the addition to Howard Hall will leave a deficit of 170,000 net assignable square feet required. GCL 1972 provided \$860,000 for the preparation of detailed plans for this 310,000 gross square foot facility which must be located near the existing and augmented medical facilities in Howard Hall and the University Hospital.

- | | |
|---|--------------|
| 8. Acquisition and clearance of land; the location of which is subject to the written approval of the Department of General Services and the Department of State Planning | \$ 1,000,000 |
|---|--------------|

As the population of the State continues to grow, the enrollments of the professional schools will need to expand. Thus, the total campus of the University of Maryland at Baltimore will necessarily increase in size. Funds requested herein are required to continue the needed expansion through the timely acquisition of properties as they become available.

- | | |
|---|---------|
| 10. Elevator replacement and modernization | 290,000 |
| Six elevators located in various buildings on the campus are included in this project. These elevators range in age from 35 to 52 years and constitute a perpetual maintenance problem. Hundreds of downtime hours are involved due to lack of parts that cannot be purchased and must be made by local machine shops. Aside from the annoyance and inconvenience, repair is very costly. | |

Total—Baltimore City Campus	\$22,719,400
-----------------------------------	--------------

(3) Baltimore County Campus:

- | | |
|--|---------|
| 1. Conversion and equipment for Academic Building No. 1: | |
| Conversion | 200,000 |
| Equipment | 207,800 |

UNIVERSITY OF MARYLAND—(Continued) :

Baltimore County Campus—(Continued) :

When Academic Building No. 1 was constructed at UMBC, there was a limited enrollment and each building was designed to perform a multi-purpose function. It has been planned from the inception that the classrooms on the first floor of this building would be converted to serve as additional biological laboratories. Funds requested herein will complete the modification and conversion of this building.

- | | |
|---|------------|
| 2. Equipment for additions to Academic Building No. 2 | \$ 309,200 |
|---|------------|

The two wing additions approximating 80,000 gross square feet are under construction. The funds requested herein will provide for the capital equipment required to make these facilities operational.

- | | |
|---|---------|
| 3. Equipment for Chemistry-Physics Building | 126,800 |
|---|---------|

When this building was constructed, it was planned that eventually the building would be composed largely of laboratories in support of the sciences. With increasing enrollment and heavier demand for laboratory space, it is planned to convert a number of the general purpose classrooms to six laboratories only. Funds requested are required for equipment in these laboratories to complete the conversion.

- | | |
|----------------------------|--------|
| 9. Site improvements | 42,000 |
|----------------------------|--------|

As new buildings are constructed on this developing campus, it is necessary to provide walk access to buildings as well as planting shrubs and general landscaping. Included in this request is construction of 125 linear feet of 8-foot sidewalk connecting the Library, Phase II, to the adjacent parking lot and site improvements for the additions to Academic Building No. 2.

- | | |
|-----------------------------|---------|
| 10. Roads and parking | 735,000 |
|-----------------------------|---------|

Previous appropriations have provided for a Loop Road for this campus with the exception of one-third of a mile. The request contained

UNIVERSITY OF MARYLAND—(Continued) :

Baltimore County Campus—(Continued) :

herein will provide the additional funds required to complete this dual road as well as to build three additional on-grade parking lots with stone base, asphalt surface and concrete curbs in order to accommodate the additional enrollment on this campus.

- | | |
|----------------------------------|--------------|
| 11. Extension of utilities | \$ 90,000 |
|----------------------------------|--------------|

This project is required to provide lighting for the parking lots referred to in project No. 10 above and for the installation of underground water and fire hydrants, storm water inlets and underground storm sewer line to provide drainage on the new Loop Road.

Total—Baltimore County Campus	\$ 1,710,800
-------------------------------------	--------------

(4) Eastern Shore Campus (Somerset County) :

- | | |
|---|--------|
| 2. Design and preparation of detailed plans and specifications for the renovation of Trigg Hall.... | 35,000 |
|---|--------|

Although this 27,509 gross square foot structure was not built until 1954, it appears to have been built with a limited budget and, consequently, the interior of the building gives an exceptionally poor impression. The walls are rough and unfinished and lighting is of the old incandescent type, providing less foot candles than is typically available in classroom and laboratory situations. Funds requested herein are required for the preparation of plans to provide for a general upgrading of the facility to the standards of our current construction in the State of Maryland.

- | | |
|--|--------|
| 5. Construction of eight tennis courts | 90,000 |
|--|--------|

Because of the isolated location of the campus, it is necessary to provide adequate recreational opportunities for students. At the present time, there are three temporary tennis courts on the campus with dirt surfaces that are inappropriate for playing. Accordingly, it has not been pos-

UNIVERSITY OF MARYLAND—(Continued) :

Eastern Shore Campus—(Continued) :

sible for the school to field an intercollegiate tennis team nor include tennis in the Physical Education curricula. The provision of eight tennis courts on this campus will provide facilities not only for intercollegiate competition but for Physical Education instruction, intramural play, and general recreational use. With the anticipated enrollment of the institution, these courts should suffice for the needs of the campus for years to come.

6. Extension of utilities \$ 122,000

Included in this project is the requirement to extend the new 13 KV underground electrical distribution and to rearrange the underground distribution, and replace portions of the overhead distribution in the vicinity of Maryland Hall and Kiah Hall. Also included are funds for a planning study to determine steam service and water service needs for future loads.

Total—Eastern Shore Campus \$ 247,000

(5) Natural Resources Institute (Calvert County) :

1. Purchase and installation of built-in equipment and utility systems for the Controlled Environmental Laboratory 510,000

In GCL 1968, 1969 and 1971, an amount of \$800,000 was provided by the General Assembly for the construction of the Controlled Environmental Laboratory. Bids were received on this facility in the summer of 1971 which far exceeded the funds available. All bids were rejected and second bids received in the spring of this year provided sufficient deduct alternates so that the basic building might be constructed with the funds available. The deduct alternates provided for omitting all built-in equipment, and installation of the sea water system which provides running sea water to the laboratories

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

UNIVERSITY OF MARYLAND—(Continued) :

Natural Resources Institute—(Continued) :

for research experiments. The funds requested herein are needed to reinstate these deduct alternates which will enable this facility to contribute much to a better understanding of the Chesapeake Bay and its resources.

Total—Natural Resources Institute	\$ 510,000
TOTAL—UNIVERSITY OF MARYLAND	\$29,942,400

PROPOSED CAPITAL BUDGET

(3) Coppin State College:
(Baltimore City)

- | | |
|--|-----------|
| 6. Construction of an addition to Library: | |
| Construction | 3,805,000 |
| Utilities | 100,000 |
| Site improvements | 115,000 |

Estimated first-year increase in operating expense:

Salaries and wages	\$ 30,000
Other operating expense	10,500
Initial supplies and equipment	30,000

Total	\$ 70,500
-------------	-----------

STATE COLLEGES—(Continued) :

Coppin State College—(Continued) :

The present library on this campus is completely inadequate not only for the projected enrollment but also for the present enrollment. Since Fall 1968, Coppin has increased its full-time day enrollment 146 percent. This project includes an addition of 61,500 gross square feet, alterations to existing building of 22,000 gross square feet air conditioning of the entire facility and space for an installation of a campus electric substation.

7. Construction of an Office-Classroom Building:	
Construction	\$5,780,700
Utilities	85,000
Site improvements	130,000

Estimated first-year increase in operating expense:

Salaries and wages	\$ 33,000
Other operating expense	37,000
Initial supplies and equipment	294,100
Total	\$364,100

This Fall, there were over 1,750 full-time students on this campus. This far exceeds the original projected 1980 enrollment of 1,350 students. Therefore, additional classroom space is desperately needed now. This building, approximating 116,800 gross square feet, will house the divisions of education, social sciences, language and philosophy and provide general faculty offices for other divisions and departments.

8. Design and preparation of detailed plans and specifications for an Administration Building ...	76,000
---	--------

Estimated first-year increase in operating expense:

Salaries and wages	\$11,000
Other operating expense	12,500
Initial supplies and equipment	40,000
Total	\$63,500

STATE COLLEGES—(Continued) :

Coppin State College—(Continued) :

The campus Master Plan, established for an enrollment of 1,350 students, projected the completion of new administration space by 1974. Since the Fall 1972 enrollment of 1,750 students far exceeded that projected in the campus plan, and since the enrollment projected has been changed to 3,000 students, the need for a separate administration building, approximating 35,000 gross square feet, has been clearly established. Funds requested herein are required to prepare detailed plans and specifications for this facility which is needed to provide adequate administrative space that is not now available on the campus.

- | | |
|--|--------------|
| 9. Design and preparation of detailed plans and specifications for an addition and alterations to Tawes Hall | \$ 90,000 |
|--|--------------|

Estimated first-year increase in operating expense:

Salaries and wages	\$ —
Other operating expense	5,000
Initial supplies and equipment	47,000

Total	\$52,000

The existing facility is totally inadequate to accommodate the needs of the existing enrollment, much less the projected enrollment of 3,000 students by 1980. A bookstore was not originally programmed for the building. The lounge is actually the entrance to the building. The food service area was designed without adequate storage, service and kitchen area to accommodate the present use. A totally redesigned facility, with proper space relationships, is essential. Funds requested herein are required for the preparation of detailed plans for an addition of approximately 22,000 gross square feet and alterations to the existing building of 23,800 gross square feet.

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

STATE COLLEGES—(Continued) :

Coppin State College—(Continued) :

10. Site development (perimeter road, parking lots and tennis courts) \$ 425,000

Estimated first-year increase in operating expense:

Salaries and wages \$ —
Other operating expense 500
Initial supplies and equipment 1,000

Total \$1,500

Although there are over 1,509 cars registered by the college, there are only 256 parking spaces on the campus scattered in nine locations. As a result, there are many cars parked in adjacent roads. In constructing various parking lots, it is necessary to construct adjacent portions of the perimeter road, not only to facilitate access but to decrease construction costs. Since the perimeter road will also eliminate the existing tennis courts, it is essential to construct new ones as replacements. The project will include necessary utility extensions, including roadway and parking lot lighting, and implementation of the landscaping program.

- 10A. To supplement the appropriation "Acquisition of land" as shown on page 931 of the Acts of 1971; Section 8 of Chapter 425 of the Acts of 1971 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose 40,000

GCL 1971 provided \$43,000 for the acquisition of this land approximating 41,250 square feet which is contiguous with college property fronting on North Warwick Avenue. This appears to be the only parcel of contiguous property that

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

STATE COLLEGES—(Continued) :

Coppin State College—(Continued) :

will ever become available to this small 29-acre land-locked college. \$83,000 represents the current appraised value of this property.

Total—Coppin State College	\$10,646,700
----------------------------------	--------------

(4) Frostburg State College:
 (Allegany County)

18. Construction of parking lots (450 spaces)	440,000
---	---------

At present Frostburg has approximately 700 parking spaces available for faculty, staff and student parking. On the other hand, the college has granted permits to over 1,600 vehicles. Frostburg does not allow resident freshmen and sophomores to park on campus; nevertheless, enrollment increases, along with additions to faculty and staff, call for an estimated additional 2,000 spaces over the present number by 1980.

12. Design and preparation of detailed plans and specifications for renovation of Compton Hall ..	90,000
---	--------

Estimated first-year increase in operating expense:

Salaries and wages	\$ —
Other operating expense	9,000
Initial supplies and equipment	10,000

Total	\$19,000
-------------	----------

Speech, theatre, music and physical education have occupied Compton Hall in the past. The music department vacated their area upon completion of the Fine Arts Building. The physical education department will vacate their area upon completion of the new P.E. facility anticipated in the Fall of 1974. GCL 1971 provided \$12,000 for preliminary planning and the request included herein will provide for detailed planning for the renovation of the existing

PROPOSED CAPITAL BUDGET

Method of Financing

Salaries and wages \$ —
 Other operating expense 1,200
 Initial supplies and equipment 41,500

Total \$42,700

GCL 1970 provided \$20,000 for preliminary planning for this project. Funds requested will permit detailed planning for remodeling the old library to provide offices, classrooms and laboratories for English, Dramatics, Speech, Foreign Languages and Audio-visual Education. Space presently occupied by stacks is to be converted to faculty offices. Project also includes mechanical and electrical renovations as required and air conditioning for the building.

19. Design and preparation of detailed plans and specifications for addition to the Service Building, Phase I 55,000

Estimated first-year increase in operating expense:

Salaries and wages \$ 6,000
 Other operating expense 11,100
 Initial supplies and equipment 4,000

Total \$21,100

The Master Planners recommended two additions to the Service Building. Phase I, approxi-

ating 27,600 gross square feet will be designed so that Phase II can be readily added. This new facility divided into six areas will provide office space, space for the Maintenance Department, Storage areas, Shops and Fenced-in storage. Funds requested herein are required for the preparation of detailed plans and specifications for this needed facility.

- | | |
|---|-----------|
| 24. Design and preparation of detailed plans and specifications for provision of additional Administrative Services areas. | \$ 80,000 |
|---|-----------|

Estimated first-year increase in operating expense:

Salaries and wages	\$ 3,800
Other operating expense	2,700
Initial supplies and equipment	10,500

Total	\$17,000
-------------	----------

The present administration building was designed to accommodate an addition. With growing enrollment on this campus adequate administrative space is becoming critical. Funds requested herein will not only provide for detailed planning for the addition to the Carter-Grant-Wilson Building but will also determine the feasibility of remodeling Trust House, a residence hall, as an Administrative Annex.

- | | |
|--|---------|
| 30. Development of North Campus (750-car parking lots) | 558,000 |
|--|---------|

As of Fall 1972, there were 1,875 cars registered by the college, but only 610 parking spaces available. The surrounding neighborhoods are being saturated with Morgan students and the neighbors are complaining. It is essential that additional parking be constructed to relieve the present situation. Funds requested herein will provide for the construction of parking lots to accommodate 750 cars, to include service drives, entrances from Hillen Road, sidewalks to main

campus, lighting, landscaping, lane lines, necessary excavation and earth movement, and utilities as required.

30A. Installation of street lighting for South campus.. \$ 50,000

Safety and security dictate the installation of street light in the vicinity of new facilities on the South campus.

Total—Morgan State College \$ 1,127,000

(6) Salisbury State College (Wicomico County) :

2. Equipment for Holloway Hall 77,000

The contract has been awarded for the renovation of this building. Funds requested herein are required for equipment to provide for the effective utilization of this facility.

14. Construction of a Physical Education Facility:
 Construction 4,500,000
 Utilities 125,000
 Site improvements 385,000

Estimated first-year increase in operating expense:

Salaries and wages \$ 40,000
 Other operating expense 38,000
 Initial supplies and equipment 87,100

\$165,100

In order to accommodate an enrollment of 3,000 full-time day students and an expanded and rapidly growing physical education program, this project is urgently needed. The present program is operating with a deficit in space approaching 8,000 square feet. Planning funds totalling \$110,000 were provided in GF 1967 and 1970. Funds requested will provide for a facility totalling 105,800 gross square feet, including a swimming pool. Site improvements included in this project also provide for a park-

STATE COLLEGES—(Continued) :

Salisbury State College—(Continued) :

ing lot for 200 cars and a new entrance to the campus as recommended in the Master Plan.

11. Design and preparation of detailed plans and specifications for renovation of Dining Hall \$ 40,000

Estimated first-year increase in operating expense:

Salaries and wages \$17,800
 Other operating expense 15,800
 Initial supplies and equipment 38,600

\$72,200

This project proposes renovation of the existing Dining Hall-Union Facility so that the entire net area of 26,000 square feet will be utilized for student dining and provide seating for approximately 800 students. The feeding capacity of the existing dining hall will be exceeded next fall. The requirement for additional dining space is rapidly becoming critical. Funds requested herein will provide for detailed plans and specifications for this project.

- 11A. To supplement the appropriation "Renovation of Holloway Hall, including air conditioning" as shown on page 519 of the Acts of 1972; Section 8 of Chapter 179 of the Acts of 1972 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for the purpose 100,000

GCL 1972 provided \$1,676,000 for the renovation of this facility. The low bid on this project was short approximately \$100,000 to totally complete the renovation. The exercise of option two at this time will afford a significant saving and assure continuity in the implementation of the project.

MARYLAND PUBLIC BROADCASTING COMMISSION:

1. Construction of an Annapolis High-Powered

Transmitting Facility:

Construction	\$ 287,000
Utilities	7,500
Site improvements	16,000
Equipment	555,000

Estimated first-year increase in operating expense:

Salaries and wages	\$ 58,070
Other operating expense	131,625
Initial supplies and equipment..	395,500

Total \$ 585,195

The Maryland Public Broadcasting network has been in development since 1966. Original plans called for television coverage over the entire State and this was to be accomplished with transmitters in seven localities. A "high-powered" transmitter—that is, with the highest possible tower and the greatest power output is proposed for the Annapolis area. With this, it appears likely that only 6, or possibly 5 transmitters will be necessary to cover all of Maryland. Also, a high-power transmitter in Annapolis will cover south Baltimore strongly, helping to solve a serious reception problem existing there. In addition, it will cover Prince George's and Montgomery Counties.

TOTAL—MARYLAND PUBLIC BROADCASTING COMMISSION	\$ 865,500

DEPARTMENT OF ECONOMIC AND COMMUNITY DEVELOPMENT:

Headquarters:

(9) Construction of the Shrine of Toleration at St. Mary's City (St. Mary's County)	
Construction	\$ 950,600
Utilities, roads, parking and site improvements	549,400

Estimated increase in operating expense:

Salaries and wages	Not yet determined
Other operating expense	Not yet determined

The passage of the "Act Concerning Religion" in 1649 by the Maryland Assembly gives Maryland claim to being one of the first civil regimes to recognize freedom of religion. 1974 will be the 325th anniversary of the passage of this act.

The construction of the Shrine and associated buildings will be accomplished by the architect at an estimated cost of \$950,000. The State will be responsible for the construction of the road to the Shrine, the parking area, all utilities and site improvements. The exact cost for the work for which the State is responsible will depend upon where the Shrine is to be located. The most likely location for the Shrine is on St. Mary's Hill or Chancellor's Point or college land north of the campus.

Part III-A

MAJOR CAPITAL PROJECTS NOW UNDER CONSTRUCTION OR FOR WHICH CONSTRUCTION FUNDS HAVE BEEN APPROPRIATED

This section presents a tabulation of all major capital projects costing \$100,000 or more which are either under construction, or for which construction funds are available and the facility is in the design stage.

There are 146 projects in this category, representing an estimated total construction cost of \$232,029,600. Thirteen of the projects listed provide 2,046 additional beds for patients, inmates, students and employees at various State mental, juvenile services, correctional and educational institutions.

During the past year, thirty-two major capital projects costing \$65,414,400 were completed and put into use. They are listed at the end of the tabulation.

MAJOR CAPITAL PROJECTS (\$100,000) NOW UNDER CONSTRUCTION OR FOR WHICH FUNDS HAVE BEEN APPROPRIATED

PROJECTS COMPLETED DURING LAST YEAR

- New Court of Appeals Building—Annapolis
- Natural Resources Building—Annapolis
- Site Improvements and Installation of Utility Lines—Rowe and Taylor Avenues—Annapolis
- New Boiler Plant and Parking Garage—Annapolis
- State Procurement Bureau Warehouse—Jessup
- Workshop for the Blind—Salisbury
- Renovations to Main and Satellite Buildings and Utilities—Woodstock College
- Installation of Air Conditioning—Deer's Head State Hospital
- Installation of Fire Protection Sprinkler Systems in Hubner Building—Springfield State Hospital
- Conversion of #1 and #2 Coal Fired Boilers to Gas and/or Oil Firing and Demolition of Present #4 Boiler—Springfield State Hospital
- Speech and Hearing Center—Rosewood State Hospital
- Installation of Additional Sprinkler Systems in Keating Cottage, Nursery Buildings I, II and III and Rehabilitation Building A—Rosewood State Hospital
- Infirmary and Isolation Quarters—Maryland Training School for Boys
- Five Living Units for Boys—Victor Cullen School
- Gymnasium—Victor Cullen School
- Wing to Work Release Center—Maryland Correctional Institution—Hagerstown
- Renovate Plumbing System in "C" Dormitory—Maryland Penitentiary
- Comprehensive Vocational Rehabilitation Center—State Department of Education
- School of Architecture Building—University of Maryland—College Park
- Additional Laboratory Space for College of Home Economics—University of Maryland—College Park
- Undergraduate Library and School of Library and Information Services—University of Maryland—College Park Campus
- Extension of Utilities—University of Maryland—College Park Campus
- North Hospital Building—University of Maryland—Baltimore City Campus
- Renovation of Dental Pharmacy Building—University of Maryland—Baltimore City Campus
- Academic Building #2 and #3 Including Air Conditioning—University of Maryland—Baltimore County Campus

Roads and Parking Areas—University of Maryland—Baltimore County Campus
Natural Science Building Including Air Conditioning—University of Maryland—
Eastern Shore Campus
Swimming Pool—University of Maryland—Eastern Shore Campus
College Dormitories—Board of Trustees of State Colleges
New Dining Hall—Frostburg State College
Administration Building—Towson State College
Academic Building—Maryland School for the Deaf—Frederick Campus

PART III-B

**POTENTIAL COMMITMENT OF FUTURE
CONSTRUCTION FUNDS CREATED
THROUGH APPROPRIATIONS OF
PLANNING FUNDS**

B-1. From Prior Construction Loans

B-2. From Proposed Appropriations in 1974 Capital Budget

Part III-B

POTENTIAL COMMITMENT OF FUTURE CONSTRUCTION FUNDS CREATED THROUGH APPROPRIATIONS OF PLANNING FUNDS

Planning funds is a term applied to an appropriation for:

- (a) Preliminary Planning Funds—any necessary study including the development of preliminary plans and specifications for a major construction project.
- (b) Detailed Plans and Specifications—the preparation of final working drawings which specify in detail the specific design and capacities for a construction project upon which basic bids are submitted.

By law, the preliminary plans and specifications must be available at the time that the General Assembly is requested to appropriate construction funds for a project. The State follows this practice in order to provide for: (1) needed engineering or other preliminary studies; (2) the development of better facility programs and plans; and (3) more accurate project cost estimates—all in the interest of obtaining the best facility for the least cost.

While it does not hold that construction funds will inevitably be provided in the first or second year following the appropriation of planning funds, there does exist a potential commitment of construction funds in the future.

The tabulation herein provided, covering planning funds in prior construction loans, discloses such a potential (based upon the Agency's cost estimate) approximating \$179,250,000. In addition, projects for which planning fund appropriations are proposed in the 1974 Capital Budget will aggregate \$53,127,800 in projected construction costs.

The total estimated costs indicated above are net of anticipated federal funds which are or may become available.

PART IV
CAPITAL PROJECTS PROPOSED
1974—1978

PART IV

DEPARTMENTAL CAPITAL NEEDS PROPOSED FOR FIVE-YEAR PERIOD, 1974-1978

This section lists all capital outlay needs, other than those associated with the Department of Transportation, which the various State departments and institutions requested be undertaken during the five-year period, fiscal 1974-1978.

The grand total of these projects requested in the calendar year 1972 for inclusion in the State's five year capital program is \$626,468,200. This represents an average annual capital outlay of \$125,294,000. Individual project requests range from a low of \$2,400 to a high of approximately \$17,841,400 in fiscal year 1974.

The tabulation and summary which follow serve to give a longer range perspective as to future capital needs and to the overall level of required capital outlay by the State. It is important to note that none of the projects other than those recommended in the fiscal 1974 Capital Budget have been officially approved. However, it should be further noted that the various departments and agencies have been requested to define their near term and future goals and objectives which will, hopefully, provide a more sophisticated, integrated five-year development plan, culminating in a long-range development program capable of being updated annually or biennially as may be appropriate. Also, it is to be remembered that those projects requested for fiscal 1974 which have been deferred or deleted for varying reasons affect the capital needs proposed in the ensuing years.

The projects herein listed which are included in the 1973 Capital Budget (F.Y. 1974) and which are to be financed with general obligation bond funds are designated by a dagger (†). The amount for each project recommended to be appropriated may differ from the sums initially requested by the various departments and institutions due primarily to adjustment in project scope, late additions and/or deletions or revised estimated costs. Cost figures represent cost to State only and do not include Federal funds available or anticipated.

Italicized total figures shown for the Board of Public Works, Department of Natural Resources, Department of Health and Mental Hygiene, Department of Public Safety and Correctional Services, State Department of Education and the Department of Economic and Community Development are shown for memoranda purposes.
